PROFESSIONAL SUMMARY

To secure a challenging role such as **Software Developer**, **Software Development Engineer (SDE)**, **Full Stack Developer** or a problem-solving-focused engineering position, where I can apply my skills in **MERN stack development**, **ETL pipeline design**, and logical problem solving to deliver innovative, scalable solutions that contribute to organizational success and support my long-term career growth.

EDUCATION

Knowledge Institute of Technology - Salem

Bachelor's of Engineering in Computer Science
CGPA - 8.6 [Up to 4th Semester]
2023 - 2027*

Mahendra International School - Nammakal

HSC - 2023
GPA Percentage - 82%
SSLC - 2021
GPA Percentage - 88%

SKILLS

- **Programming Languages**
Java , SQL , Python , C
- **Web Development**
React.js , Tailwind CSS , HTML , CSS , Node.js , Express.js , Vite
- **Tools & Technologies**
Git , Github , Docker , Canva , Figma , Power BI

CERTIFICATIONS

- **Front-End Development Certification** — Imagecon Academy
- **Python Programming (Basic)** — GUVI
- **SQL (Basic)** - Hacker Rank
- **Python for Data Science** - IBM
- **The Joy of Computing using Python** - NPTEL - Elite
- **Introduction to Industry 4.0 and Industrial Internet of Things** - NPTEL - Elite + Silver

CO-CURRICULAR ACTIVITIES

- Participated in the **MSME Hackathon** and shortlisted for the final round.
- Selected for the final round of the **MKCET Hackathon** for presenting an innovative tech solution.
- Published a Paper on **International Journal of Advanced Science and Engineering Research** in the domain of Healthcare. [View](#)

PROFESSIONAL EXPERIENCE

Frontend Development Intern

Imagecon Academy | July 2024- August 2024

- Gained hands-on experience in **HTML**, **CSS**, **JavaScript**, and modern front-end frameworks.
- Built responsive and user-friendly web pages using real-world design requirements.
- Collaborated with peers on mini-projects, applying best practices in **UI/UX** design.
- Learned to debug and optimize code for performance and cross-browser compatibility

Data Science Intern

APT Computer Education| June 2025 - July 2025

- Applied Python for Data Science with libraries like **Pandas**, **NumPy**, and **Matplotlib** for data cleaning, analysis, and visualization.
- Conducted **Exploratory Data Analysis (EDA)** to identify trends, patterns, and outliers in diverse datasets.
- Gained hands-on experience in statistical analysis and implemented machine learning models for classification and regression using **scikit-learn**.
- Created data-driven insights and visual dashboards to effectively communicate findings and support decision-making processes.

PROJECTS

- **FinQuest - MERN Stack** - [View](#)

Built a finance education platform focused on **students**, making **financial concepts** easy to understand through interactive learning modules, **real-world examples**, and **gamified experiences** that help develop strong financial literacy and smart money habits.

- **Retail Sales ETL Pipeline** - [GitHub](#)

Built an ETL pipeline that **collects retail sales** data from different sources, cleans and organizes it, and stores it in a **MySQL database**, making the data easy to analyze and use for gaining meaningful business insights.

- **Kidney Chronic Disease Prediction** - [GitHub](#)

Developed a **machine learning model** to predict kidney disease using health-related data, focusing on **accurate classification of patient conditions** through effective **data preprocessing**, **feature selection**, and model evaluation, enabling early risk identification and supporting better clinical decision-making and preventive care.
